KEY FINDINGS & RECOMMENDATIONS

- Segment B2 has the highest loss ratio at 33.9%, 4.3pp above portfolio average - recommend pricing review
- Utility segment is most profitable at 19.1% - headroom to offer competitive rates and grow market share
- Mid-range claims (£1k-£5k) account for 56.9% of total claims cost despite being the most frequent band
- Major claims (>£15k) represent only 5% of cost share - reinsurance above £15k excess appears justified
- Logistic regression model (AUC 0.556) confirms segment and region density as strongest claim predictors
